Covid-19 evolution, South America (data from JHU CSSE, 5/18/20)

- **Total number of recovered**
  - Log scale graph showing the cumulative number of recovered cases over time.
  - Different countries are represented with distinct lines.

- **Recovered by day**
  - Graph showing the number of recovered cases per day, with countries marked.
  - Log scale is used for better visualization of the data.

- **Growth rate (%) of recovered**
  - Graph illustrating the percentage growth of recoveries over time, with doubling times indicated.
  - Countries are distinguished with specific markers.

- **Acceleration of recovered**
  - Graph depicting the acceleration of recoveries, with countries highlighted.

Doubles every 6, 7, 8, 9, 10, 15, and 30 days are marked on the growth rate graph.
