Covid-19 evolution, 10 most affected countries (data from JHU CSSE, 6/28/20)

Total number of deaths for $10^6$ people

Total number of deaths for $10^6$ people (log scale)

Growth rate (%) of deaths ($\frac{\Delta \text{deaths}}{\Delta \text{population}}$)

Deaths by day for $10^6$ people ($\frac{\text{deaths}}{10^6 \text{population}}$)

Deaths by day for $10^6$ people ($\frac{\text{deaths}}{10^6 \text{population}}$) (log scale)

Acceleration of deaths for $10^6$ people ($\frac{\Delta^2 \text{deaths}}{\Delta \text{time} \cdot 10^6 \text{population}}$)
